

PRESSURE VESSELS AND TANKS

- BASIC TECHNICAL INFORMATION**

We carry out design and construction work in the field of pressure and non-pressure vessels and apparatuses mainly for energy. Piece deliveries of pressure vessels are carried out according to our own documentation or documentation supplied by the customer. Production and certification of vessels is carried out according to ČSN EN 13445, ČN 690010, EN ISO 3834-2 SN.

Production

We also provide assembly, repair and reconstruction of pressure vessels, revision and testing of pressure equipment in a supplier manner, consultancy and consultation.

- PRODUCTION POSSIBILITIES**

Pressure	0 to 5 MPa
Temperature	-50 to 350 °C
Tank diameter	max. 3 000mm
Wall thickness	max. 50mm
Tank material	standard P265GH, 16Mo3 and others as required
Height of the tank	max. 20m
Tank weight	max. 50t
